Example Bots

Round Up To Different Accounts On Payday

No two months are the same, so moving money needs flexibility to support this. Setting conditional saving deposit based on the amount left in users account (if any) allows them more control over building savings. For extra peace of mind, they can also send messages to authorise some or all of their saving bots automations.

Set Saving Goal for a Holiday

Goals can be set in the setup options of the bot. If users want a set amount of money for a special occasion, they can set a goal and compare it with their account balance. They can also add logic based on common habits and expenses, making their savings more personal and tailored to their lifestyle.
